

DNS Platform integration (App) with Splunk

Customer

Customer is a leading DNS Solution Provider. It provides distributed domain name server services.

Customer requested the development of a Splunk App to integrate with it's DNS platform.

Requirement

Technology Solution

Sacumen developed the Splunk app containing 1 Dashboard. This Dashboard consists of 15 items. Splunk app fires the Splunk Search Query against the indexed data (data ingested into Splunk by the Splunk Add-on) and build the items in the Dashboard.

Both Splunk app and add-on support Splunk Enterprise (version 7.1)
