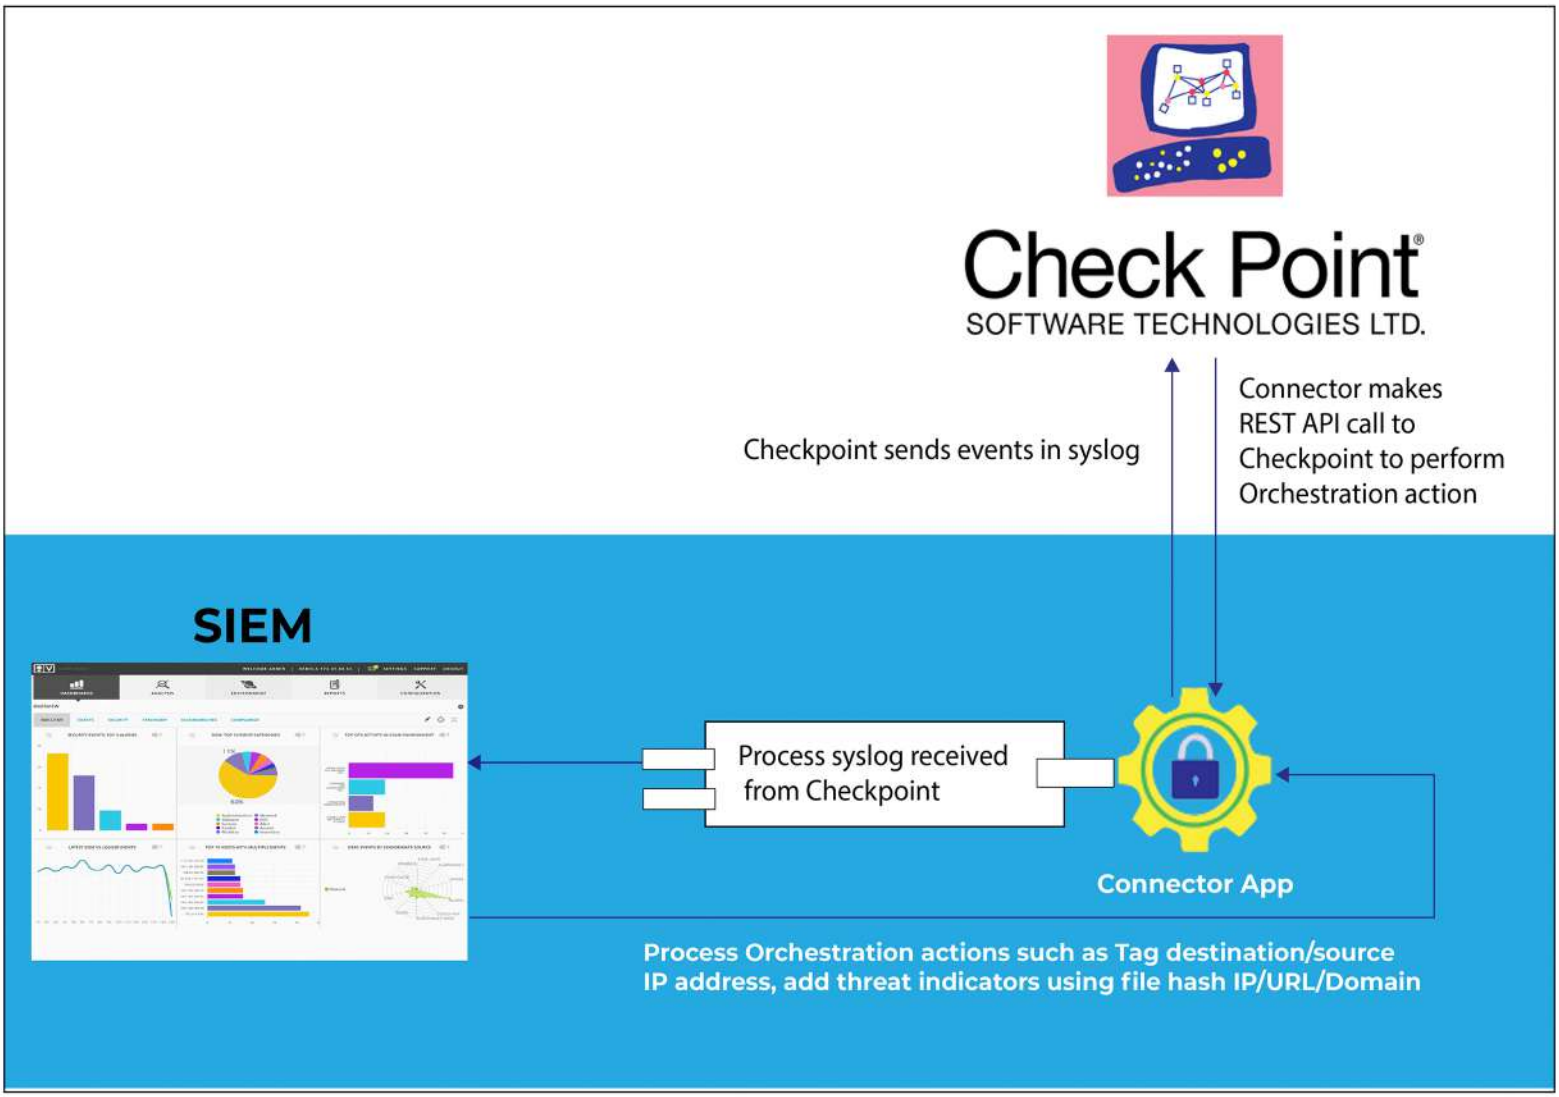
SIEM Integration with Check Point



Customer

Customer is a leading SIEM solution provider.
They provide a platform for companies to aggregate and act upon Threat Intelligence.

Customer requested to build a Connector to provide deep security monitoring for Check Point integrated platform actions, helping safeguard critical infrastructures through early threat detection and rapid response.

Requirement

Technology Solution

- Check Point Connector provides the capability to monitor and respond to Check Point Firewall events.
- Sacumen developed the Connector using Java and it performs the following actions:
  - Advanced security orchestration allows you to view Check Point events and alarms, through a consolidated dashboard.
  - Perform security orchestration and automated response (SOAR) actions.
  - Data enrichment and analytics help you capture, analyze, visualize, and respond to threats on your Check Point platform.
  - Easily view threats impacting your organization, with insights into patterns and anomalies.
  - Ability to respond to threats rapidly and automatically.
