

## Visual Studio Code Extension for leading SAST product

**SAST PLATFORM**

VS Extension makes REST API calls to the platform to perform full source code scan

Customer is a leading SaaS based Application security solution provider

## Customer

Client demanded development of a certified Visual Studio (VS) Extension that would scan the full source code on demand against its SAST platform and display the scan results in the Eclipse custom perspective

## Requirement

## Technology Solution

- Sacumen developed the certified VS Code Extension
- The plugin was written in Java language using the Eclipse Plugin framework
- User can upload the workspace code from the Visual Studio Code
- Extension makes REST API calls to the platform for full source code scan
- Scan results can be viewed in a custom Scan result window
- Support for VS Code 1.38 – VS Code 1.39
