

## Visual Studio Extension for leading SAST product

**SAST PLATFORM**

VS Extension makes REST API calls to the platform to perform full source code scan

Customer is a leading SaaS based Application security solution provider

## Customer

Client demanded development of a certified Visual Studio (VS) Extension that would scan the full source code on demand against its SAST platform and display the scan results in the Eclipse custom perspective

## Requirement

## Technology Solution

- Sacumen developed the certified VS Code Extension
- The plugin was written in C# language using the VS Extension framework
- User can upload the workspace code from the Visual Studio
- Extension makes REST API calls to the platform for full source code scan
- Support for Visual Studio 2019
- Scan results can be viewed in a custom Scan result window
